

Day 23 – July 12, 2025

Topic: Project Optimization & Performance Tuning

Introduction

Today I focused on improving app speed and efficiency.

Techniques

- Minimized load time, optimized images, and queries.
- Implemented caching strategies.

Challenges Faced

- Identifying performance bottlenecks.

Key Learnings

- Optimization enhances user experience.
- Profiling tools are helpful for large apps.

Conclusion / Reflection

Optimized app feels faster and smoother. Learned practical performance improvements.
