Day 16 – July 5, 2025

Topic: Deployment Basics (Vercel & Heroku)

Introduction
Today I learned how to deploy full-stack applications to production.

Steps

- Frontend deployed on **Vercel**.

- Backend deployed on **Heroku** with environment variables.

Challenges Faced

- Build errors and missing environment configs.

Key Learnings

- Deployment is crucial for real users to access apps.

- Proper environment management is essential.

Conclusion / Reflection
Deployment brought my project to life. Excited to share it with others.
